

OUR ENVIRONMENTAL POLICY

As Erkurt Holding, we undertake to protect our natural resources by improving the resources of our world, which are getting fewer and fewer every day.

Based on this purpose:

- We constantly review all our processes from raw material entry to shipment of our products with the ISO 14001 standard, environmental legislation, and main industry requirements, and undertake to fulfill our convenience obligations.
- We make use of new technologies and methods to protect the environment and prevent the risks in our activities, we undertake to protect the environment and work safely with procedures and emergency
- We ensure the use of environmentally friendly chemicals
- We minimize our effects on indispensable and restricted receiving environments such as soil, water, and air by controlling our wastes at source and increasing their reuse and recycling.
- We reduce resource use with the understanding of reuse and recycling.
- We keep energy and water usage under control and provide maximum saving.
- It is our greatest wish to supply today's needs without consuming the resources of the future with sustainable production techniques.
- We keep our environmental policy open to our employees, suppliers, customers, and all related parties.
- These principles are the most important factor taken into consideration in the formation of the plans and targets of our management and our employees.
